(54) Title: METHOD AND DEVICE FOR MEASURING, DETERMINING AND CONTROLLING FLATNESS OF A METAL STRIP

(57) Abstract: The invention refers to a method for optimizing measurement and control of the flatness of a strip of rolled material. The invention is achieved by accomplish a mapping by associating to relevant flatness fault types a reference strip model and an actuator space conversion matrix. The invention also refers to a device for optimizing measurement and control of the flatness of a strip of rolled material.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
